Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Group I, claims 1-14, drawn to an electronic device, classified in class 257, subclass 666.
- II. Group II, claims 15-20, drawn to a method of making the electronic device, classified in class 438, subclass 123.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, instead of "coating at least the bottom surface of an integrated circuit with a capacitive dielectric" and "securing the bottom surface of the IC, with the capacitive dielectric, to the leadframe", instead the surface of the leadframe on which the IC is mounted can be coated with the capacitive dielectric and the bottom surface of the IC can be secured to the coated surface of the leadframe.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification,

Art Unit: 2811

recognized divergent subject matter and that the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
